Viraj Patil

Curiosity. Code. *Real impact.*

I build systems that see, think, and interact. From intelligent prototypes to considered storefronts, I turn curiosity into useful software.

---

01 / VOICE AI · PROTOTYPE / LOCAL PROTOTYPE

NOVA / ADA

Python / Ollama / Whisper / Native desktop UI

A private desktop voice companion exploring natural conversation, reminders, and explicit desktop actions.

WHERE IT STANDS

A working local prototype with a GitHub application/update layer. Future exploration includes an ESP32 desk companion and richer personal context.

View project: github.com/LSK-25/ADA-v2 →

---

02 / E-COMMERCE · CLIENT PROJECT / LIVE WEBSITE

BILLi&BoBA

Next.js / TypeScript / Tailwind CSS / Supabase

A mobile-first storefront for custom press-on nails, designed around browsing, sizing, and a clear purchase journey.

WHERE IT STANDS

A deployed Vercel storefront with responsive product UX and an owner-managed media workflow.

03 / E-COMMERCE · CLIENT PROJECT / LIVE WEBSITE

Sadafuli by Isha

Next.js / TypeScript / Tailwind CSS / Supabase

A premium saree storefront pairing editorial product discovery with a WhatsApp-first purchase journey.

WHERE IT STANDS

Deployed on Vercel with a publication workflow and WhatsApp-first checkout. The store keeps brand presentation and catalog administration in one system.

---

04 / COMPUTER VISION · PROTOTYPE / WORKING PROTOTYPE

Sentinel

Python / OpenCV / YOLO / Flask

A local surveillance prototype combining person detection, motion analysis, and an intrusion-monitoring dashboard.

WHERE IT STANDS

Validated the capture-to-dashboard workflow locally, including monitoring status and intrusion evidence.

Let’s start a conversation.
